

FIELD ALLOCATION & ASSIGNMENT

The SYSA Fields Task Force comprises volunteers from throughout the association and staff members from SYSA. The Task Force has been working continually since 2010 to adapt and improve the method for allocating the practice fields that SYSA receives from Seattle and Shoreline Parks and Schools in the fall to its member clubs.

SYSA has over 14 recreational and select clubs and over 7,000 players at U10 and older playing on over 50 fields in Seattle and Shoreline including grass, synthetic, and sand, both lighted and unlighted, spread out in random fashion throughout the association. Creating a distribution system that meets the goals and guidelines the task force set for itself has been a complex and challenging task. Thanks to the volunteers who have worked so hard to get this right, and to our members for their patience as we work for the common good of all our players.
